Digital Fundraising Transformation — Impact Force

Project Title: Digital Fundraising Transformation — Impact Force Poverty Alleviation
Prepared by: Cloud Ninja Team
Business Analyst: Keerthana. B
Date: 2025
Version: 1.0
Platform: Salesforce Nonprofit Cloud + Experience Cloud

1. Product Overview

The Impact Force Poverty Alleviation Digital Fundraising Platform is a complete cloud-based solution built on Salesforce Nonprofit Cloud + Experience Cloud, enabling seamless donor engagement from online registration to donation receipt.

The system automates the full fundraising lifecycle:

Enquiry → Donor Registration → Lead Conversion → Online Donation → Receipt → Reports

This document provides product-level details for Impact Force management, covering:

- System purpose & value
- Functional modules
- Donor journey (end-to-end flow)
- Key features
- Portal capabilities
- Roles & permissions
- Business benefits

2. Product Purpose

The Impact Force Poverty Alleviation Salesforce solution is designed to:

- Digitize the entire donor journey from registration to receipt
- Provide a self-service donor portal for online donations
- Enable secure online payments through Razorpay payment gateway
- Provide real-time status tracking (Registration, Payment, Receipt)
- Improve NGO team productivity through automation
- Enhance donor transparency, trust, and satisfaction
- Give management real-time visibility into fundraising performance
- Provide 24/7 AI-powered donor support through Agentforce

Key Value

Before this platform, the NGO managed donors through spreadsheets and emails, receipts were prepared manually, and there was no 24×7 support. This platform eliminates all manual effort and brings everything into one unified Salesforce ecosystem.

3. Product Modules

The platform consists of 7 core modules working together seamlessly:

1. Experience Cloud Donor Portal

- Public pages for NGO overview & enquiries
- Donor login for registration & payments
- Donation history & receipt download
- Mobile-responsive design

2. Lead & Donor Management

- Web enquiry creates Lead in Salesforce
- Duplicate check by email/phone
- Lead converted to Contact on first donation
- Household Account auto-created

3. Razorpay Donation Processing

- Razorpay order auto-created on Pay button
- Secure Razorpay checkout
- Payment callback sent to Salesforce
- Transaction ID stored in Salesforce

4. Donation Transaction & Receipt

- Record created after payment success
- Linked to Contact & Household Account
- Auto PDF receipt emailed to donor
- Admin can re-send receipt anytime

5. Agentforce AI Chat Support

- 24/7 AI assistant on the donor portal
- Answers donation process queries
- Checks payment & receipt status
- Escalates unresolved queries to staff

6. Slack Notifications

- Real-time donation alerts to team
- High-value donation priority alerts
- Daily summary at end of day
- New donor & system error alerts

7. Reports & Dashboards

- Daily donation collection report
- Lead to donor conversion report
- Razorpay reconciliation report
- Donor-wise summary dashboard

4. User Roles & Access

The platform supports multiple user profiles — both donors (external) and internal NGO team members.

4.1 External Users — Donors

Donors access the platform through the Salesforce Experience Cloud portal. They can:

- Register online and create a donor profile
- Make secure online donations via Razorpay
- View their donation history and transaction details
- Download or receive donation receipts via email
- Get 24/7 support from the Agentforce AI chat

4.2 Internal Users — NGO Staff

Role	Key Capabilities	Salesforce License
NGO Admin	Full platform management, donor records, flows, automation config, re-send receipts	Salesforce
Finance Team	Gift Transactions, Payment records, Razorpay reconciliation, receipt management	Salesforce
Fundraising Team	Lead management, donor engagement, campaign tracking, follow-ups	Platform
Support Team	Handle donor queries, manage Agentforce escalations, donor communication	Service Cloud
NGO Manager	View all dashboards, receive Slack summaries, monitor KPIs and performance	Salesforce
System Admin	Salesforce configuration, Slack/Razorpay integrations, user management, error alerts	Full Admin

5. Donor Journey (End-to-End Flow)

The complete donor lifecycle from first contact to receipt is managed automatically by the platform.

1

Enquiry & Homepage Visit

Donor visits the NGO's Experience Cloud portal. The homepage displays the NGO's mission, vision, poverty alleviation programs, and a clear 'Register' button.

2

Donor Registration

Donor fills the registration form capturing: First Name, Last Name, Email, Phone, Address, Company, Lead Source, Preferred Campaign, and Communication Preferences. A Lead is created in Salesforce. Duplicate check is performed by email/phone.

3

Lead Created in Salesforce

System automatically captures the registration as a Lead. A confirmation email is sent to the donor. The fundraising team is notified for follow-up engagement.

4

Donation Intent

Donor clicks 'Donate Now' on the portal. Donor selects the campaign/cause and enters the donation amount in INR (minimum ₹1). System validates the amount and checks for existing Contact record.

5

Lead Conversion

On first donation, the Lead is converted: Account (Household) is auto-created. Contact record is created/updated. Linked to the Donation.

6

Razorpay Payment Processing

Donor is redirected to the Razorpay secure checkout. Donor pays via UPI, Card, Net Banking, or Wallet. Razorpay sends payment confirmation callback to Salesforce via API.

7

Gift Transaction Creation

On payment success: An Receipt (Gift Transaction) is created in Salesforce with status 'Posted'. A receipt record is linked to the donation. Razorpay Transaction ID is stored. .

8

Automatic Receipt

A PDF donation receipt is auto-generated from the Donation. The receipt is emailed to the donor's registered email. Receipt contains: Donor Name, Amount, Date, NGO details, and Transaction ID.

9	**Slack Notification to NGO Team** A real-time Slack notification is sent to the NGO team channel with: Donor Name, Donation Amount, Date & Time, Payment Status. High-value donations trigger a priority alert to the NGO Manager.

10	**Reports & Dashboards Updated** All dashboards update in real time. NGO Manager can view daily collection, donor trends, campaign performance, and Razorpay reconciliation data.

6. Product Features (Detailed)

6.1 Donor Portal Features (Experience Cloud)

- View NGO mission, programs, and impact stories
- Self-registration with full personal details
- Secure online donation with Razorpay
- Donation history page with transaction details
- Receipt download from the portal
- Agentforce AI chat widget available 24/7
- Mobile-responsive design for all devices

6.2 CRM Features for NGO Staff

- Lead management with duplicate detection
- Automated Lead-to-Contact conversion on first donation
- Structured Gift Transaction pipeline
- Integrated Razorpay payment verification and reconciliation
- Receipt re-send capability from Salesforce
- Donor 360-degree view — all donations, communications, history in one place

6.3 Automation Features

Automation	Trigger	Action
Lead Creation	Donor submits registration form	Lead record created in Salesforce, confirmation email sent
Duplicate Check	Email/Phone submitted on registration	System checks existing Lead/Contact, prevents duplicates
Lead Conversion	Donor ticks 'Donate Now'	Lead converted to Contact + Household Account
Razorpay Order	Donor clicks Pay button	Razorpay order created and

		checkout opened
Gift Transaction	Payment success callback received	Donation + receipt record auto-created in Salesforce
Receipt Email	Donation created with status Posted	PDF receipt auto-generated and emailed to donor
Slack Alert	Donation recorded in Salesforce	Real-time Slack notification sent to configured channel
High-Value Alert	Donation exceeds threshold	Priority Slack alert sent to NGO Manager
Daily Summary	End of business day	Slack summary with total donations, amounts, success/fail count

6.4 Integration Features

- Razorpay REST API — order creation, payment verification, Transaction ID storage
- Slack API — real-time webhook-based notifications from Salesforce Flows
- Agentforce — AI agent connected to Salesforce donor data for context-aware responses
- Salesforce Email — automated receipt and confirmation email delivery

7. System Architecture Summary

The product is built on the following Salesforce components working in an integrated ecosystem:

Component	Technology	Purpose
CRM Core	Salesforce Nonprofit Cloud (NPSP)	Leads, Contacts, Accounts, Donation, receipt
Donor Portal	Salesforce Experience Cloud	Public donation portal, donor self-service
Payment Gateway	Razorpay REST API + Apex	Secure INR donation processing and verification
AI Support	Agentforce	24/7 donor query resolution and support
Team Alerts	Slack API + Salesforce Flows	Real-time donation notifications and daily summaries
Automation	Salesforce Flows (Record-Triggered)	End-to-end business logic automation
Reporting	Salesforce Reports & Dashboards	KPI visibility, reconciliation, donor analytics
Data Model	NPSP Standard + Custom Objects	Households, Contacts, donation, receipt

Integration Flow

Donor Portal (Experience Cloud) → Salesforce NPSP (Lead/Contact/Donation) → Razorpay (Payment) → Salesforce (Gift Transaction + Receipt) → Slack (Notifications) + Agentforce (AI Support)

8. Key Benefits to Impact Force

8.1 Donor Benefits

Benefit	Description
Easy Online Giving	Donors can donate anytime from anywhere using UPI, Card, Net Banking, or Wallet
Instant Receipt	PDF receipt emailed automatically — no waiting for manual processing
Full Transparency	Donors can view all their past donations and transaction history

	on the portal
24/7 Support	Agentforce AI chat answers queries round the clock without needing human agents
Secure Payments	Razorpay provides bank-grade security for all transactions

8.2 NGO Staff Benefits

Benefit	Description
Zero Manual Data Entry	Leads, Contacts, Donation, and receipt are created automatically
Real-Time Alerts	Slack notifications keep the team informed of every donation instantly
Duplicate Prevention	System checks for duplicates by email/phone, keeping data clean
Centralized Donor View	Full 360-degree donor profile — all donations, receipts, history in one place
Reduced Receipt Effort	Receipts auto-generated and sent — admin only steps in for re-sends

8.3 Management Benefits

Benefit	Description
Real-Time Dashboards	Live KPIs on donation totals, campaign performance, and donor trends
Accurate Reconciliation	Razorpay reconciliation report eliminates financial discrepancies
Daily Summaries	Automated Slack daily summary — no need to manually pull reports
Conversion Visibility	Lead-to-Donor conversion funnel shows fundraising effectiveness
Scalable Platform	Salesforce grows with the NGO — more campaigns, donors, and integrations possible

8.4 Business Impact (Before vs After)

KPI	Before (As-Is)	After (To-Be)
Lead Tracking	0% — Google Forms only	100% — Every registrant tracked as Lead in Salesforce
Receipt Turnaround	2 days (manual Word/PDF)	Instant — Auto-generated and emailed on payment success

Donor Support	Manual — phone calls only	24/7 — Agentforce AI chat + human escalation
Financial Visibility	Excel spreadsheets, low accuracy	Real-time Salesforce dashboards and Razorpay reconciliation
Donation Processing	Cash/manual bank transfer	Secure online payment via Razorpay (UPI, Card, Net Banking)
Duplicate Donors	High risk — no system checks	Eliminated — Salesforce duplicate matching rules

9. Support & Maintenance

The platform includes ongoing support and maintenance to ensure smooth operation for all users.

9.1 Support Scope

- Salesforce Admin maintenance for configurations, flows, and automations
- Support for donor portal login and registration issues
- Monitoring of Razorpay payment gateway integration and callbacks
- Agentforce AI agent knowledge base updates and response tuning
- Slack integration monitoring and channel configuration
- Periodic review and update of reports and dashboards
- User access management and license administration

9.2 For Issues, Contact

Support Type	Contact	Response
Donor Portal Issues	Agentforce AI Chat (24/7) on the portal	Instant
Donor Query Escalation	NGO Support Team via portal contact form	Within 24 hours
Salesforce Admin Issues	Salesforce Admin — KM Honda / Cloud Ninja	Same business day
Payment/Razorpay Issues	Finance Team + Development Team	Within 4 hours
System Errors/Alerts	System Admin — via Slack #system-alerts	Within 2 hours
Training Requests	Cloud Ninja Team — Project BA	Scheduled session
