An outbound change set contains customizations that you want to send from this organization to another organization. These customizations can include new components or modifications to existing components, such as apps, objects, reports, or Apex classes and triggers. An outbound change set can't be used to delete or rename components in another organization.

Example uses:

- Deploy Apex classes and triggers developed in sandbox to production
- Copy custom objects and other customizations to a sandbox without refreshing it
- Migrate changes across environments, e.g. dev sandbox to QA sandbox to production

Hi ,

I've received the build for **Donation Object**. I am now deploying this to the **QA Environment** for further testing.

I will notify you if any issues arise during the deployment process. Otherwise, you can track the status via the JIRA.

Regards,

Siva Ranjini K

Ready for Testing: Donation Object deployed to QA

Inbox ×

Siva Ranjini <sivaranjini2691@gmail.com>
to Indhulekha, animani1010

Fri, Feb 13, 5:05 PM (5 days ago)

Hi ,

The following component has been successfully deployed to the **QA Environment** and is ready for validation:

- **Component:** Donation
- **Deployment Time:** 13/02/2026, 4:26 pm

Please verify the changes and provide your feedback. If you encounter any deployment-related blockers, let me know immediately.

I have attached the Technical Design Document and Deployment Checklist for the Donation object. Please review them and let me know if any changes are required.

Regards,

Siva Ranjini K

to Indhulekha

Fri, Feb 13, 6:36 PM (5 days ago)

Hi ,

Following the successful sign-off in QA, I am now deploying a Donation Object to the **UAT Environment**.

Please conduct your final review and provide your formal sign-off or feedback via Email . Your approval is required before we proceed with the Production release.

Regards,

Siva Ranjini K

Manage Donation Details

Description

As a Fundraising/NGO Staff User

I want to create and maintain Donation records with amount, donor details, and recurring payment frequency

So that we can track one-time and recurring donations accurately and manage donor contributions efficiently

---

Acceptance Criteria

1. User can create a new **Donation record**.
2. User can enter **Donation Amount (Currency)**.
3. User can select **Donor (Lookup to Contact/Account)**.
4. User can choose **Donation Type** (One-time / Recurring).
5. If Recurring is selected, user must select **Frequency** (Monthly, Quarterly, Half-Yearly, Yearly).
6. User can enter **Start Date and End Date** for recurring donations.
7. System should automatically calculate **Next Payment Date**.
8. User can set **Payment Status** (Pending, Completed, Failed).
9. User can add **Payment Method** (Cash, UPI, Card, Bank Transfer, etc.).
